More range.
More features.
More possibilities.

The DI3S offers more.

There are many EDM's on the market. But can any match the DI3S? Check the features yourself. Range is 1000 m to one prism, 1600 m (1 mile) to 3 prisms, 2000 m to 9 prisms. Measurement is fully automatic. Accuracy is \pm (5 mm + 5 ppm). And you're always certain because the standard deviation of the measurement is displayed. Most instruments only give the slope distance. The DI3S displays slope distance **plus** horizontal distance, difference in height, and even coordinate differences. Atmospheric, sea level

and scale factor corrections are applied. Readout is in metres and feet. In tracking mode, the measurement repeats automatically every 3 seconds for setting out on land or water. The DI3S combines with Wild T1, T16 and T2 theodolites. With the T1 and T16 it transits for angle measurement in both positions. Write for brochure G 1 329e or, better still, ask for a demonstration of the Wild DI3S Electronic Reduction Tacheometer. Remember, you'll do much **more** with the DI3S.
