CLOSING ADDRESS

Prof. E. Fumagalli, Director of ISMES

At the close of this Colloquium, 'Interface between Computing and Design in Structural Engineering', as Director of ISMES, I like, also on behalf of our Managing Director, Prof. Alfredo Marazio, to thank all those of you who have so kindly participated in this discussion on the most interesting topics in the sector of computer methods. I feel we should also extend our thanks to IABSE for having sponsored this meeting and having lent its weight and prestige to the colloquium. At the same time I should like to thank the Chairman, Prof. Faneli and the Member of the Task Group, who have made every effort to represent the spirit of this debate with their contributions.

Finally, I think all of us here would wish to thank the Members of ISMES organization who have made every effort towards a successful outcome of these discussions. I should also rightfully mention Dr Pistocchi, who has dealt with the public relations aspects, and especially our kind secretaries who have lent a graceful note as well as their habitual efficiency.

And now that we have come to the end of our work, I trust we shall be able to say that we have enriched our knowledge and understanding of problems in this field. It only remains for me now to thank you once again on behalf of ISMES and wish you "bon voyage" and a hearty good-bye.
