Everything you ever wanted in a telephone and less.

Less of a problem, our 'dual mode' phones are specially designed for use in cafes, restaurants, clubs, etc. When a customer wants to use your phone, one turn of the key and your private telephone becomes a coin-operated payphone. When they've finished, a turn of the key and you have your private telephone once again.

Less installation, because our pay-

phones may be fixed to a wall, or simply placed on a table or counter.

Less space, since the telephone's compact size, coupled with its light elegant appearance, makes it acceptable in any surroundings.

Less maintenance, our telephones incorporate a diagnostic program which enables faults to be located and rectified on-the-spot.

Less cost, for whilst Landis & Gyr telephones possess built-in quality and reliability, they are surprisingly inexpensive. In addition, tariffs can be programmed to produce a profit.

The choice is yours and whichever you choose, you'll have less trouble when you specify Landis & Gyr.

Payphone technology, a touch friendlier.
