# WHAT WOULD YOU DO WITH 90 TERABITS PER SECOND?

A first-year art student can move every painting in the Louvre to her dorm room.

A movie buff can download movies in 3-D.

A hotel chain can place videophones in every single one of their rooms.

A couch potato in Boston can enjoy HDTV—ditto for the rest of the city.

A telecommunications company can streamline seventeen networks into one.

A tech support manager can do system-wide upgrades in the blink of an eye.

A town in west Texas can open its own branch of the Library of Congress.

A company can change the Internet forever.

The Cisco Carrier Routing System.

Carrier class IP. Fast lane to IP Next-Generation Network.

[Cisco.com/go/sp](http://Cisco.com/go/sp).

THIS IS THE POWER OF THE NETWORK. NOW.
