Vereinsnachrichten: Guidelines for contributors

Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. [Siehe Rechtliche Hinweise.](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. [Voir Informations légales.](#)

Terms of use

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. [See Legal notice.](#)

Details not mentioned in these guidelines can be asked at the managing editors office or via Internet:
<http://www.birkhauser.ch/fields/journals>

Manuscripts: Three copies of the manuscript ready for printing, each accompanied by copies of all illustrations and tables, should be sent to the editor (address see below). Computer disks with either figures or text should remain with the author until final acceptance of the manuscript.

Manuscripts in English, French, German and Italian will be considered.

Eclogae geologicae Helveticae do not accept manuscripts which at that time have been submitted to other journals in the same or a similar form.

If manuscripts in their final version will be submitted as computer disks, the the following points have to be considered:

- Text in Windows/DOS- or Macintosh-format (MS Word if possible)
- saved in two versions:
 - Standard text-format of the specific program
 - RTF-format
- the hard-copy version and the version on disks have to be identical.
- digitized figures have to be saved as EPS- or TIFF-format.

In construction of a manuscript, the following points should be considered:

a) **Title of the paper:** short, but expressing the principal aim of the paper.

A short running title (max. 50 characters) should be provided.

b) **Author(s):** Full name, address(es) and phone-number, if possible FAX and e-mail numbers.

c) **Keywords:** 5 to 10 keywords are necessary

d) **Abstract:** A brief (max. 15 lines), informative ABSTRACT is necessary. Papers in English must be accompanied by an additional ZUSAMMENFASSUNG in German and/or a RESUME in French and/or a RIASSUNTO in Italian.

e) **Text:** (incl. ABSTRACT, figure captions, references): They should be typed on one side of paper, double spaced and with margins of 2.5cm on each margin.

f) **Printing types** (italic, bold, capitals, petit) (e.g. for fossil names) should be clearly indicated.

g) **Abbreviations:** Each abbreviation should be explained explicitly when first used.

h) **Paleontologic nomenclature:** For paleontologic names (genus and species) biological citation rules should be respected (see also Eclogae geol. Helv. 64 (1971), 641-643 or 649-651).

i) **References** cited in the text: References should be made giving the author's name with the year of publication. Examples: (Laubscher 1973, 1975; Meyer 1930) or as Trümpy (1969, Fig.2) stated....

When reference is made to a work by two authors «&» (without a comma before «&») should be used; by three or more authors, the first author followed by «et al» is cited.

j) **Reference list:** If more than one paper of the same author is cited, the name is replaced by «-». Abbreviations of the journals follows the directions in «Abkürzungsverzeichnis zum Zitieren von erdwissenschaftlichen Arbeiten» (1974) (may be ordered from the managing editor).

The list of references has to be compiled alphabetically in the following standard manner.

ARTHAUD, F. & MATTE, P. 1975: Les décrochements tardi-hercyniens du sud-ouest de l'Europe. Géométrie et essai de reconstitution des conditions de la déformation. Tectonophysics 25, 139-171.

- 1977: Late Paleozoic strike-slip faulting in southern Europe and northern Africa: result of a right-lateral shear zone between the Appalachians and the Urals. Bull. Geol. Soc. Amer. 88, 1305-1320.

BLÜM, W. 1989: Faziesanalyse im Rotliegenden des Nord-schweizer Permkarbon-Trogs (Hochrhein-Region zwischen Basel und Laufenburg). Eclogae geol. Helv. 82, 455-489.

JAMES, N. 1983: Reef environment. In: Carbonate Depositional Environments (Ed. by SCHOLLE, P.A., BEBOUT, D.G. & MOORE, C.H.). Amer. Assoc. Petroleum Geol. 33, 346-440.

Tables, drawings and photographs: The originals of all tables, drawings and photographs are retained by the author until acceptance of the manuscript. They will be sent directly to the publisher afterwards.

Captions for figures and tables have to be written together on a separate sheet.

Text in line drawings and tables must be chosen to be easily readable when reduced. Bar scales are preferred to numerical scales.

Symbols and patterns must be lettered directly (not coded by numbers!).

Photographs should be of good, nicely reproducible quality. Bar scales are preferred.

Folded plates are always at the end of the paper. Authors should especially ensure that their height does not exceed 260 mm (including upper and lower margins).

Charge. A page charge will be applied in the case of excessively long manuscripts. Costs for plates larger than page size, large tables and colour illustrations as well as author corrections will be charged to the author(s).

Offprints. Fifty offprints of each paper are supplied free and are sent to the responsible author. Additional copies may be purchased and should be ordered directly from the publisher. (An order form is sent to the responsible author together with the proofs).
