

**Zeitschrift:** Eclogae Geologicae Helvetiae  
**Herausgeber:** Schweizerische Geologische Gesellschaft  
**Band:** 96 (2003)  
**Heft:** 2

**Artikel:** Geology of the NW Indian Himalaya  
**Autor:** Steck, Albrecht

### **Inhaltsverzeichnis**

**DOI:** <https://doi.org/10.5169/seals-169014>

### **Nutzungsbedingungen**

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. [Siehe Rechtliche Hinweise.](#)

### **Conditions d'utilisation**

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. [Voir Informations légales.](#)

### **Terms of use**

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. [See Legal notice.](#)

Contents

<b>1 Introduction</b> .....	149	<b>3 Elements of the Neo-Tethys ocean crust, island arcs and the Ladakh batholith of the Asian margin</b> .....	161
<b>2 Pre-Himalayan tectonics, sedimentation and magmatism of the North Indian crust</b> .....	149	<i>Oceanic crust, Spongtang Klippe, Karzok unit and blueschists of the Indus Suture zone</i> .....	161
<i>The Lesser Himalaya</i> .....	149	<i>The Nindam-Dras Formation (Callovian-Cenomanian)</i> .....	161
The Rampur Formation (Proterozoic) .....	149	<i>The Ladakh intrusives of the active Asian margin (103 ± 3 – 49 ± 0.8 Ma, U-Pb zircon ages)</i> .....	161
The Garsha and Berinag Formations (Proterozoic) .....	150	<b>4 The Himalayan tectonics, metamorphism, magmatism and sedimentation</b> .....	161
The Shali Formation (early and middle Riphean) .....	150	<i>The Indus Group (Late Cretaceous-Neogene)</i> .....	161
The Simla Slates (late Riphean-Vendian) .....	150	The Khalsi Limestone (Aptian-Albian) .....	162
The Jaunsar Formation (late Riphean-Vendian) .....	152	The Miru-Chogdo Flysch (Cenomanian-early Eocene) .....	162
The Blaini Formation (Vendian) .....	152	The Gongmarula-Hemis-Nurla Molasse (early Eocene?) .....	162
The Krol Formation (Vendian) .....	152	The Basgo Formation (Maastrichtian) .....	164
The Tal Formation (Early Cambrian) .....	152	The Nimu Sandstones (Paleocene-Lower Eocene?) .....	164
The Lower Crystalline nappe .....	153	The Temesgam Formation (Paleocene-early Eocene?) .....	164
Conclusions on the stratigraphy of the Lesser Himalaya .....	153	The Chilling and Butum-Kargil Formations (Mio-Pliocene?) .....	164
<i>The High Himalaya</i> .....	153	The tectonics of the sediments of the Indus Group .....	164
<i>The Gondwanan series</i> .....	153	The metamorphism of the Indus Group .....	165
The Haimantas (Riphean?-Early Cambrian) .....	153	<i>The Himalayan nappes</i> .....	165
The Lower Haimantas (Riphean?) .....	153	The Shikar Beh nappe .....	165
The Middle Haimantas (Vendian?) .....	154	The N-verging Warwan, Bobang, Bor Zash and Wakha recumbent folds and N-directed Dras nappe .....	166
The Upper Haimantas (Vendian?-Early Cambrian) .....	154	The Barrovian metamorphism (M1) of the Shikar Beh nappe stack .....	166
The Karsha Formation (Middle and Late Cambrian) .....	154	The North Himalayan nappes .....	167
The Kurgiakh Formation (Late Cambrian) .....	154	The eclogitic Tso Morari nappe .....	167
The Thaple Formation (Ordovician) .....	155	The high pressure metamorphism (M2) of the Tso Morari nappe .....	167
The Ordovician magmatism .....	155	The higher (non eclogitic) units of the North Himalayan nappe stack .....	167
The Muth Formation (Devonian) .....	156	The Barrovian metamorphism (M3) of the North Himalayan nappe stack .....	171
The Lipak Formation (Middle Devonian-Early Carboniferous) .....	156	Kinematics of the North Himalayan nappes .....	171
The Early Carboniferous continental basalts .....	156	The High Himalayan nappe or "Crystalline nappe" .....	172
The Po Formation (Late Carboniferous) .....	156	The tectonic units of the Lesser Himalaya .....	173
The Ganmachidan Formation (Early Permian) .....	156	The Lower Crystalline nappe .....	174
The Panjal Traps (Late Carboniferous-Early Permian) .....	156	The Barrovian metamorphism (M4) of the High and Lesser Himalayan nappes .....	174
The Yunam granite (Early Permian, 284 ± 1 Ma, U-Pb zircon age) ..	157	The Zanskar Shear Zone, the Miocene leucogranites, the Gianbul dome, the Kanjar shear zone and related retrograde metamorphism (M5) .....	175
<i>The Neotethyan shelf</i> .....	157	The history and origin of the metamorphism of the High Himalayan or "Crystalline" nappe .....	175
The Kuling Formation (Late Permian) .....	157	<i>The Subhimalaya</i> .....	176
The Lilang Group (Triassic) .....	157	The Subathu Formation (Thanetian-Lutetian) .....	176
The Tamba Kurkur Formation (Scythian-Anisian) .....	157	The Murree Formation (Oligocene? – Early Miocene) .....	177
The Hanse Formation (late Ladinian-late Carnian) .....	157	The Siwaliks or Siwalik Group (Miocene-Present) .....	178
The Nimaloksa Formation (late Carnian-lower Norian) .....	157	The Himalayan Frontal Thrust Belt .....	178
The Alaror Group or Quartzite Formation (Norian) .....	158	The Neogene and Quaternary Himalayan accretionary wedge and active Himalayan structures .....	179
The Kioto Formation (late Norian-Liassic-Aalenian) .....	158	<b>5 Discussion and conclusions on the structural and metamorphic evolution of the Himalayan range and its sedimentary record</b> .....	181
The Laptal Beds (early Callovian) .....	158	<i>The age of the continental collision</i> .....	181
The Middle Jurassic alkaline magmatism .....	158	<i>The geometry of the N Indian margin before continental collision</i> .....	181
The Spiti Shales (Oxfordian-early Berriasian) .....	158	<i>The formation of the Himalayan accretionary wedge</i> .....	182
The Giumal Sandstones (Early Cretaceous) .....	158	<i>Estimates of the post collisional shortening in the Himalaya</i> .....	186
The Chikkim Formation (Cenomanian-Campanian) .....	158	<i>Doming and NE-verging backfold structures</i> .....	186
The Kangi La Shale (Late Cretaceous) .....	158	<i>Conclusion</i> .....	187
The Stumpa Quartzite (Danian) .....	158		
The Shinge La Formation (Paleocene) .....	158		
The Kong Formation (Ilerdian-Ypresian) .....	159		
Tertiary Olistostrome .....	159		
The Neotethyan slope .....	159		
The Lamayuru Formation (Early Permian-Late Cretaceous) .....	159		
Conclusions on the composition and history of the Pre-Himalayan North Indian continental margin .....	159
