EXCEPTIONAL TRANSPORT OPERATION CARRIED OUT BY THE SWISS FEDERAL RAILWAYS

Among the number of unusual jobs carried out by the Swiss Federal Railways during the first 6 months of this year must be mentioned the carriage of a turbine measuring over 13 feet in diameter and weighing 190 tons, from Munchenstein near Basel in Switzerland, to Kalundborg in Denmark, for installation in a heating plant there. ABUNDANT FRUIT CROP IN SWITZERLAND

The fruit crop has started in Switzerland. In volume, it is the most abundant that has been known since the beginning of the century. According to estimates, the quantity of fruit which will be put on the market—this, not including the fruit used by producers for their own requirements—will amount to 18,000 wagons table fruit, i.e., to nearly 442 million pounds, and to 25,000 wagons of fruit for the manufacture of cider, i.e., about 551 million pounds. These figures exceed the normal measure by 100 per cent and more. As the production in other fruit-growing countries is also good, Switzerland will, in all probability, be unable to export much fruit this year.
