Hello Children

Where did ice cream originate?

The origins of ice cream can be traced back to Rome in the 4th century BC. The Roman Emperor Nero ordered ice to be brought from the mountains and combined it with fruit toppings. In the 13th century, Marco Polo learned the Chinese method of creating ice and milk concoctions and brought it back to Europe. Over time, recipes for ices, sorbets and milk ices evolved and were served in the fashionable Italian and French Royal Courts. The use of ice mixed with salt to lower and control the temperature of the mix of ingredients proved a major breakthrough in the creation of ice cream as we know it. The invention of the wooden bucket freezer with rotary paddles facilitated its manufacture. It was a Baltimore company that first produced and

marketed ice cream wholesale in 1851. The treat became both distributable and profitable with the introduction of mechanical refrigeration.

FACT FILE

During the 20th century many brands of ice cream were marketed on a large scale in supermarkets. Ice cream sundaes have also become very popular desserts with people of all ages.

Easter Competition pictures are on pages 15 and 16.

Hello Children

Easter Drawing Competition

Winners age 11-14 years

Veronica Noetzli 12yrs

Jessica Nussbaumer 14yrs

Helen Werder 11yrs

Winners age 7-9 years

Anna Buhler 8yrs

Giulia Eugster 8yrs

Judith Hurschler 7yrs

Winners age 4-6 years

Anneliese Katz 5yrs

Amelia Fransen 6yrs

Anton Rufer 4yrs
