DAS KANN NUR
EIN INSERAT.

Apples make great carrots.

When's the last time you came across a business machine that gets people more excited than a trip to Acapulco or a color TV?

Personal computers are the hottest products of the year, and Apples are the hottest personal computers.

Because there are more ready-to-use programs for Apples than any other personal computer. And there's more you can do about anything for just about anybody. From playing games to plotting the stock market, from plotting sales to plotting the orbits of electrons.

Apple is the best-known, most desired brand in the category with 99% better unaided brand awareness than our nearest competitor.

So it's a great incentive for top achievers. And it's also a great tool to help them achieve even more. An Apple speeds up business tasks and helps make better decisions faster. Which turns a great price into a grand prize...increased productivity.

It's the kind of computer that makes you do more things with Apples than with any other personal computer in the world.

Including motivating people.

The most personal computer.
