the 1990s, the number of people in the world who are poor has increased from 1.1 billion to 1.5 billion. The number of people who are extremely poor has increased from 600 million to 800 million.

There are a number of reasons for this. One is that the world population has increased from 5 billion to 6 billion. Another is that the world economy has not grown as fast as it should have.

There are a number of things that we can do to help reduce poverty. One is to help the world economy grow faster. Another is to help the world population grow more slowly.

There are a number of things that we can do to help the world economy grow faster. One is to help the world population grow more slowly. Another is to help the world population grow more slowly.

There are a number of things that we can do to help the world population grow more slowly. One is to help the world population grow more slowly. Another is to help the world population grow more slowly.

There are a number of things that we can do to help the world population grow more slowly. One is to help the world population grow more slowly. Another is to help the world population grow more slowly.
