from the scene of the explosion. Radioactive products present in water and mist could spread rapidly and there would be nothing to stop them contaminating persons and objects over an area of many square miles.

There would be a real danger if they entered the body through breathing or by contaminated food, water, pipes or cigarettes.

What is most disturbing, say the experts, is that a radioactive particle cannot be destroyed by exposure to atmospheric conditions, heat or chemical treatment. The only thing is for it to decay naturally — and this might take anything from a few seconds to many years, according to the type of element concerned.

Such terrible and frightening facts, however, are already out of date. Today the supreme weapon is the hydrogen bomb. If one of these burst over the Alps the effects of an ordinary atomic explosion described here would seem puny by comparison.

OUR NEXT ISSUE.

Our next issue will be published on Friday, June 11th, 1954.

We take this opportunity of thanking the following subscribers for their kind and helpful donations over and above their subscriptions: W. Bosshardt, P. Hatx, F. Conrad, E. Wey, H. P. Buchmann, Jos. Moesch, W. A. de Vigier, A. W. Sommer, E. A. Grau, M. E. Lichtensteiger, A. E. Banderet, G. Ashley, X. Speckert, H. Pfrter, R. Delarageaz, P. Lehrian.

Organise your life for SUCCESS with BIO-RHYTHMICS

IF you knew your "off-days" and "on-days" in advance you would know when to go all out and when to be cautious, when to conserve energies and when they can be expended to best advantage. **THE SCIENCE OF BIO-RHYTHMICS CAN TELL YOU.**

This science enables the curves of the Physical, Emotional and Mental powers — which govern "on" and "off" days — to be accurately computed. To illustrate this more fully we give a sample Biogram for the month of March 1952 of a person born on Monday, May 25th, 1931.

IN period 'A' it will be seen that between the 5th-16th of the month all his faculties are in their 'plus' position and he is therefore at his highest efficiency. During period 'B', the 17th-27th, his faculties are 'minus', and with his capabilities reduced he should take things easily. His 'battery is re-charging' and his physical strength recuperating. At period 'C' he is building up again until, on the 31st, he is again at 'plus' physical strength and emotion.

Knowing this data **IN ADVANCE** enables conferences, decisions, journeys, competitions, etc., to be planned for and entered upon with improved chance of success. Already many Swiss Football teams train and select their players for different games on the basis of personal Biograms; a Swiss Airline rest their pilots during 'off' periods as forecast by Biograms; a Swiss Railway checks on its engine drivers and signalmen by the same method.

To obtain *your* Biogram (12 cards) covering the next 12 months, send your exact day and date of birth, together with 21/- and start to organise your life for **SUCCESS.**
