## A MERGER IN THE SWISS TEXTILE INDUSTRY

Five Swiss textile firms have just joined to form a holding company known as Arova Co. Ltd., in Schaffhausen, where the head-office and one of the factories are also located. The manufacturing programme of the new firm includes the production of string and rope, the dressing of polyester fibres, the twisting of sewing thread, the dyeing of yarns for carpets, the weaving of tarpaulins and furnishing fabrics, the manufacture of pressurized inflatable hangers, the working of plastic foil, etc. This new group, under one management and equipped with a research department, will impart new life to a number of old activities which risked being left behind by the development of new products.

## AT LAST AN ELECTRIC MANICURE SET

The tiresome chore of filing one's nails has at last been made easy and fast by the electric manicure set "Chapfyl", which consists of a small streamlined plastic handle — attractive, light and handy — into which is inserted a steel sapphire powder file, one side coarse and the other fine. Connected by a cord to the case containing three 1.5 volt batteries, the set works with a rapid to-and-fro motion making it child's play to file not only the nails on both hands and feet, but also corns, callouses and hard skin on the feet. The inexpensive Chapfyl manicure set requires no special maintenance, the motor being mounted on self-lubricating bearings; the sapphire files can be changed but have a very long life, and the batteries providing several months of running power avoid any danger of electric shocks.
