CHECK THE COST OF WATER!

Recirculation saves money

Get around to recirculation thinking on water usage and cut costs dramatically. The RTC series of package tank coolers and hermetic air-cooled package chillers make pure economic sense. Acro-Kool has process and drinking water applications. The ice-bank build-up system gives a large output quickly and still saves.

Acrochill offers this typical performance: 300 gph with water discharged at 60°F with a temperature difference of 10°F. This machine is widely used in injection moulding, metal plating, bakery and confectionery. All units are factory-tested for rapid installation.
