Professor / Assistant Professor (Tenure Track) of Digital Integrated Circuits and Systems

The Department of Information Technology and Electrical Engineering (www.ee.ethz.ch), ETH Zurich, invites applications for a tenured professorship or tenure-track assistant professorship in digital integrated circuits and systems. The new professor is expected to develop a strong research program in digital integrated circuits for complex and embedded systems, such as those crucial for communications, multimedia, signal processing and networking, in deep submicron and nanometer VLSI technologies.

The applicant will be expected to have a Ph.D. degree, as well as an established track record or proven potential in such disciplines as embedded systems, communications, digital signal processing, and architecture of dedicated digital computing machines or processors. Theoretical rigor and creativity in one or more of the fields above will be essential, as is the ability of the candidate to reduce such theoretical ideas into practice by way of high performance, low power and cost-effective VLSI microchips. The new professor will be expected to teach undergraduate level courses (German or English) and graduate level courses (English) in electronics, signal processing or computer engineering subjects typical of an ECE department. The position can be filled at either assistant professor (tenure track) or professor level, depending on the age, scientific experience, and record of the applicant. Assistant professorships have been established to promote the careers of younger scientists. An assistant professor will be initially appointed for four years with the possibility of renewal for an additional two-year period and promotion to a permanent position.

Please apply online at www.facultyaffairs.ethz.ch. Your application should include a curriculum vitae, a list of publications, and statements on future teaching and research activities. The letter of application should be addressed to the President of ETH Zurich, Prof. Dr. Ralph Eichler. The closing date for applications is 30 November 2011. With a view towards increasing the number of women in leading academic positions, ETH Zurich specifically encourages women to apply.

Professor of Mathematics

The Department of Mathematics at ETH Zurich (www.math.ethz.ch) invites applications for a professor position in Mathematics. We are seeking candidates with an outstanding research record and a proven ability to direct research of high quality. Willingness to teach at all university levels and to participate in collaborative work both within and outside the school is expected.

The new professor will be responsible, together with other members of the Department, for teaching undergraduate (German or English) and graduate courses (English) for students of mathematics, natural sciences and engineering.

Please apply online at www.facultyaffairs.ethz.ch. Your application should include your curriculum vitae and a list of publications. The letter of application should be addressed to the President of ETH Zurich, Prof. Dr. Ralph Eichler. The closing date for applications is 30 November 2011. With a view towards increasing the number of women in leading academic positions, ETH Zurich specifically encourages women to apply.
