Professor of Mathematics (Mathematical Physics)

The Department of Mathematics (www.math.ethz.ch) at ETH Zurich invites applications for a full professor position in Mathematics with a focus in Mathematical Physics. We are seeking candidates with an outstanding research record and a proven ability to direct research work of high quality. Willingness to participate in collaborative work both within and outside the school is expected. Furthermore, the new professor will be responsible, together with other members of Department, for teaching undergraduate (German or English) and graduate courses (English) for students of mathematics, natural sciences and engineering

Please apply online at www.facultyaffairs.ethz.ch

Applications should include a curriculum vitae, a list of publications, and a statement of your future research and teaching interests. The letter of application should be addressed **to the President of ETH Zurich, Prof. Dr. Ralph Eichler. The closing date for applications is 30 April 2014.** ETH Zurich is an equal opportunity and family friendly employer and is further responsive to the needs of dual career couples. In order to increase the number of women in leading academic positions, we specifically encourage women to apply.

Swiss Federal Institute for Forest,
Snow and Landscape Research WSL

Assistant Professor (Tenure Track) of Landscape Ecology

The Department of Environmental Systems Science (www.usys.ethz.ch) at ETH Zurich and the Swiss Federal Research Institute WSL (www.wsl.ch) invite applications for an assistant professor position to lead a research group in Landscape Ecology. The professorship will be established as a joint position between ETH Zurich and WSL. The new colleague will be expected to engage in extensive research collaborations with those professorships and research groups at ETH Zurich and WSL that share similar interests, and with other relevant institutions both nationally and internationally. The overall goal of this professorship will be to develop an integrative approach that focuses on the temporal and spatial interactions between processes such as competition, animal and plant dispersal, natural disturbance dynamics and the drivers of environmental change, so as to develop a predictive understanding of how landscape patterns emerge.

The new professor will develop an internationally recognized research program focusing on the interactions between the spatial patterns of land cover and ecological processes, with implications for the provision of multiple ecosystem services. His or her research will contribute to the development of new concepts to assess, predict and manage landscape dynamics at regional scales over decades to centuries. The new professor will be expected to teach undergraduate level courses (German or English) and graduate level courses (English).

This assistant professorship has been established to promote the careers of younger scientists. The initial appointment is for four years with the possibility of renewal for an additional two-year period and promotion to a permanent position.

Please apply online at www.facultyaffairs.ethz.ch

Applications should include a curriculum vitae, a list of publications, a statement of your future research and teaching interests and the names and contact information of three possible referees. The letter of application should be addressed **to the President of ETH Zurich, Prof. Dr. Ralph Eichler. The closing date for applications is 15 April 2014.** ETH Zurich is an equal opportunity and family friendly employer and is further responsive to the needs of dual career couples. In order to increase the number of women in leading academic positions, we specifically encourage women to apply.
